

STANDBY GENERATORS

If you own a generator large enough to handle your location's entire electric load, you could be saving through our Generator Program. By allowing the Cooperative to run your generator to source your load during a peak period, *you receive a lower electric rate all month long.*

By controlling load use, Western Iowa Power Cooperative saves money on our wholesale power cost allowing us to pass that savings on to our customers.

To find out what you could be saving, contact our member service department for more information.

WHAT DOES IT MEAN?

HP (Horsepower) - A unit of measurements of power (the rate at which work is done). **1 HP = 746W**
kW (kilowatt) - A unit of electric power,
1 kilowatt (kW) = 1,000 watts (W).

WORKSITE SAFETY

Ensure the safety of your worksite! Powerlines can be both above and below ground. So before you dig, call Iowa One Call at **1-800-292-8989** to request underground utility location and ALWAYS look up and look out! Contact our office immediately if you're working in close proximity to overhead electric power lines.

RECYCLING OLD APPLIANCES

Refrigerator.....\$50/unit
Freezer.....\$50/unit

* Some restrictions apply. Call our office for more program details.

ADDITIONAL ENERGY SAVINGS

Contact us for more information regarding additional energy efficiency opportunities for Commercial & Industrial and Agricultural applications, such as:

- Commercial Energy Audits
- Account Reviews

Why would an electric company offer incentives for their customers to use LESS of their product?

BECAUSE WE BELIEVE THE GREENEST KILOWATT-HOUR IS THE ONE YOU NEVER USE.

Western Iowa Power Cooperative is a not-for-profit electric cooperative providing safe, reliable, affordable, and environmentally responsible power to our 5,563 member-owners living in west central Iowa.

Western Iowa Power Cooperative has invested over \$36,700 over the past five years, contributing to over 340,000 kilowatt-hours (kWh) of energy savings over the life of the measures installed. This savings represents enough electricity to power more than 32 homes for a full year!

HEAT PUMPS

LARGE GROUND COUPLED HEAT PUMP

Any type, with or without De-Superheater.

New \$1,400/ton

Replacement \$750/ton

- Maximum rebate amount allows up to 30% of cost up to \$75,000/business/farm.

AIR-TO-AIR HEAT PUMP

Any type.

If backup heat is:

Electric \$700/ton

None/Propane/Natural Gas \$500/ton

- Maximum rebate allows up to 30% of cost of unit up to \$75,000/business/farm.
- Same rebates apply to new and replacement units.

DUCTLESS MINI-SPLIT HEAT PUMP

Any type; Must be ENERGY STAR® certified.

If backup heat is **Electric**:

New \$800/ton

Replacement \$400/ton

If backup heat is **None/Propane/Natural Gas**:

New \$400/ton

Replacement \$200/ton

- Limit 1 unit per lease-able room.
- Maximum rebate allows up to 30% up to \$75,000/business/farm.

CONTROLLED WATER HEATERS

Energy Factor (EF) of 90% or greater on 50 gallon units or larger.

50 Gallons \$300/unit

51 Gallons - 75 Gallons \$350/unit

76 Gallons - 85 Gallons \$400/unit

86 Gallons - 105+ Gallons \$500/unit

- Must be for hot water use only (not space heating).
- Storage-only units with no operating electric elements do not qualify for this rebate.
- Can be either conventional resistive or heat pump type water heaters.
- Does not apply to on-demand or tankless water heater systems.
- Maximum rebate is lump sum or 30% of cost.

SWITCH MAKES CENTS

LOAD MANAGEMENT PROGRAM

COMMERCIAL & INDUSTRIAL AND AGRICULTURAL LOAD CONTROL

Switch Makes Cents participants agree to have radio-controlled switches installed on qualifying equipment. You save money because special rates or credits are available on all equipment connected to the switch. When electric demand peaks, the switches cycle the equipment off and on to reduce the electric peak, thus helping decrease electric costs. The equipment automatically returns to normal operation when the cooperative's electric demand returns to normal levels. Most Switch Makes Cents participants agree that comfort levels are maintained in the home even when the equipment is switched off periodically during high demand peaks. Contact our office for more information.

** If a renewable energy facility, such as wind, solar, biomass or hydro is utilized as a source of generation or as an alternate/supplemental energy supply at the member/consumer location, rebate and load management programs are available ONLY if the renewable energy facility is fully (100%) put into the grid. The renewable energy facility may not utilize net metering, nor first source a load before feeding the electric grid.

INSULATION

GENERAL BUILDING INSULATION

Professionally installed 10% of cost*

- Blown-in, spray foam, Aeroshield, insulating concrete forms, rigid styrofoam panels and/or structural insulated panels. Building must have electric heat as primary heating source.
- *Maximum rebate not to exceed \$2,000 per building per year.

MOTORS & SOFT-START DEVICES

VARIABLE SPEED MOTORS \$30/HP*

- New, variable speed, energy efficient motors installed in C&I or Ag building.

SOFT START DEVICES \$30/HP*

- Qualifying soft start devices installed on an existing motor in C&I or Ag building. Rebate is based on the HP of the new motor being installed.
- *Maximum rebate of \$5,000 per motor/device.

Seasonal applications are NOT ELIGIBLE for this rebate

ELECTRIC VEHICLE CHARGER

LEVEL 2 CHARGERS 50% of cost*

- Must be a Level 2 charger (208-240V).
- Member must provide charger make, model, serial number, and specifications.
- Must have built-in, accessible meter or utility meter installed.
- Load control switch required.
- Must be hardwired and installed to meet all codes.
- Cannot back-feed into the system.
- *Maximum rebate not to exceed \$1,200 per charger. Maximum of five (5) chargers per account.

CENTRAL AIR CONDITIONER

Must be ENERGY STAR® Certified \$100/unit

- Must be connected to a load control switch
- Rebate applies to new equipment only.
